**RESTAURANT MANAGEMENT SYSTEM**

...Redefining  
Restaurant  
Business

## About CIPL

Cybernet India Pvt. Ltd. (CIPL) is an India based Information System consulting company Committed to provide high quality, value added business solution designed to meet growing Needs of Total Business Automation Solution. CIPL has associate offices all over the Middle East, covering Dubai, Muscat, Bahrain, Kuwait and Doha. CIPL is a 100% Export Oriented Unit registered with Software Technology Park of India, a Government of India enterprise.

CIPL is proud to launch a new star on the horizon of **Restaurant Management solution** in the form of **Butler, complete RESTAURANT MANAGEMENT SYSTEM**. The System will also support & work state of the art **Touch Screen based POS systems of all brand** for efficient handling of **Order taking, Billings** and other transactions. A complete Business management suite specifically designed and developed for **Front & Back Office operation of Restaurant/Coffee Bars/Fast Food Joints Establishments**. This package is unique with its modular approach with enhanced security features for handling Restaurant operations of Order Management, Recipe Management, Sales Accounting, Cash Management and Inventory/Stock Management with Graphical Analysis MIS Reports. The package has a unique module of **Customer Relation Management (CRM)** that allows storing the customer's preferences.

The **VISION 2020 RESTAURANT MANAGEMENT SYSTEM (Butler)** has in built interface to **VISION 2020 LOGISTICS for STOCK and FINANCIALS** (including trail and Profit & Loos A/C) Management, thus providing **Complete Business Solution**.

Our **VISION 2020 ERP** fully support **Cloud Server** base data processing (**Real Time** data processing for back office operations and in **Batch mode** for front office). All front office billing related transactions will get sink with the cloud server automatically after small time gape, depending on the individual client requirement.

Shortly we will be adding Tally interface from our system so that you're all financial related transaction will remain in the same system as maintained earlier.
